

Palmira Peciuliauskiene

SHORT PROFESSIONAL INFO

Palmira Peciuliauskiene is professor in the Department of Education Science at Lithuanian university of educational sciences. Her research interests include improvement of natural science didactics, application of informational technologies in educational practice of natural science subjects. Palmira Peciuliauskiene is also interested in the integration and in the application of cross-curriculum relations in the content of natural science subjects. She examines the usage of cross-curriculum relations in her dissertation Internal and external integration of physics contents in VIII- IX grades at the conditions of linear education (2000). Palmira Peciuliauskiene examines the integration by the sociological point of view in the monograph Generation Z: creativity and integration (2013) (co-author). She wrote a series of physics textbooks for XI - XII grades and physics exercise books for VII-XII grades students. Palmira Peciuliauskiene has created a lot physics tasks and theoretical material of interdisciplinary content for physics educational practice. P. Peciuliauskiene actively participates in scientific conferences and international programs.
